

Eagle Harbor Holdings Allowed Strategic Telematics Patent

BAINBRIDGE ISLAND, WA -- 12/1/2011 - - Eagle Harbor Holdings, LLC (EHH) announced today the U.S. Patent and Trademark office has allowed patent application 12/880,773 on a First Office Action allowance. This particular patent is a crucial building block for the future of Telematics, particularly vehicle maintenance scheduling and reporting, and emissions reporting including information associated with combustion by-products, e.g. carbon. The patent claims a priority date of April 2001.

The new intellectual property specifically describes a secure method for logging and reporting vehicle data through a Bluetooth paired cellphone, using either the data or voice channel of a wireless network. The system operates a logging manager that monitors and identifies certain data from the vehicle for logging based on a set of rules, and sends at least some of the data to a server based on those rules, transmission may be based on a polling request from a call center or an event (like air bag deployment). The system also includes a security manager to determine authority to access the data. Additional aspects include reporting system failure or possible failure, reports based on elapsed time or elapsed mileage; or reports that include fuel consumption, engine and vehicle efficiency data. This new patent is one of 17 pending for the automotive space.

David Marsing, EHH's Chief Strategy Officer, stated: "This latest application is one of 26 pending, 17 of which relate directly to the auto industry. Additionally,

our existing portfolio of 18 issued patents is crucial to the automotive industry, with our inventions having been installed in tens of millions of vehicles to date. We have been at this for well over a decade and will persist in developing the best possible engineering and technology for our automotive partners and consumers worldwide. Our continued role is to define advanced next-generation solutions for the integrated automobile. Expect to see more newly issued patents in early 2012."

About Eagle Harbor Holdings, LLC

Eagle Harbor Holdings is a developer of new technologies for the automotive and industrial waste remediation industries. EHH focuses on the earliest stages of development, building from scratch and taking ideas through the "beta" stage to prove commercial viability. EHH focuses on a variety of technology markets such as industrial metals recovery/recycling and automated vehicle situation awareness and vehicle infotainment. Collectively, EHH engineers are named inventors on more than 200 issued patents. EHH co-founders, Dan Preston and Joe Preston, were also founders of Airbiquity, Inc. and Medius, Inc, and are considered pioneers in the field of vehicle telematics. Through Airbiquity, Dan Preston and Joe Preston were key players in the evolution of the OnStar digital system. EHH subsidiaries include MediusTech, Elixsys, Emergent Metals, Chameleon, SenTech Systems, and AutoTalk. More info at <http://www.ehhllc.com>.
