

Dr. Barry Scheetz joins as Chief Scientist of Eagle Harbor Holdings subsidiaries, Elixsys & Salixsys

Bainbridge Island, WA, --- July 28, 2010 --- Eagle Harbor Holdings, LLC, a technology engineering developer and intellectual property licensor, announced today that Dr. Barry Scheetz will join as Chief Scientist of its subsidiaries, Elixsys, LLC and Salixsys, LLC.

Dr. Scheetz joins Eagle Harbor Holdings following 35 years at Pennsylvania State University as professor of Materials, Civil, and Nuclear Engineering. As a materials scientist, Dr. Scheetz specializes in chemistry and mineralogy, with a career focus on the large-volume utilization of industrial by-products. Dr. Scheetz holds approximately 40 combined U.S. and foreign patents and is the author of 200 scientific publications. He has served on numerous National Research Council committees.

Dr. Scheetz stated, "In light of the recent focus on clean energy technologies, I'm excited to work with the Salixsys team to bring some of my coal fly ash remediation concepts to market. On the Elixsys side, we'll be ramping up our efforts in e-waste recycling with a focus on new patents and licensing agreements to benefit the entire industry. There are fascinating times ahead."

"I'm impressed by Dr. Scheetz and his ideas. Having him on board will give us a compelling edge for our waste remediation and electronic waste recycling technologies," said Dan Preston, Eagle Harbor CEO. "Dr. Scheetz's background in materials engineering will be an ideal blend with the skill set of the Eagle Harbor Holdings team."

Eagle Harbor Holdings (EHH) has rapidly grown into a technology engineering leader developing an array of new technologies from their conceptualization to their commercialization. As wholly owned subsidiaries, Elixsys and Salixsys are developing new methods for recycling and recovering precious metals from electronic waste and industrial waste.
