

David Marsing Joins Eagle Harbor Holdings Staff as Chief Strategy Officer

Bainbridge Island, WA, --- February 25, 2011 --- As part of its continued plan for growth in 2011, Eagle Harbor Holdings (EHH), LLC announced today that technology veteran David Marsing has joined the EHH staff as chief strategy officer. Initially Mr. Marsing will concentrate on the formation and staffing of AutoTalk, LLC, a new telematics company, and Elixsys, LLC with a focus on strategic planning for the implementation of plant facilities both in the U.S. and International markets.

Mr. Marsing is a retired executive of Intel Corp where he had multiple roles including VP of Technology and Manufacturing Group and Chief Operating Officer of Intel's Network Communications Group. He was instrumental in establishing and ramping up semiconductor manufacturing plants and assembly and test facilities worldwide that were needed for new technologies and products. Mr. Marsing demonstrated the leadership and innovation in the semiconductor industry in the areas of large scale startups and rapid scaling of new technologies. His technical and organizational experience in delivering new technologies into the market enabled him to be recognized as one of the "Top 10 Knowledge Leaders" in the country. "David clearly understands the challenges of how to design, organize and execute the rapid scaling of new technologies, and in particular what it takes to go vertical," said Dan Preston, EHH CEO. "We're fortunate to have him onboard."

Mr. Marsing stated: "I have followed EHH growth since the company's inception in 2009, and I'm impressed

with the progress the team has made. A year ago the company was an unknown start-up, and now presently EHH is attracting millions of dollars in investment funds. In the coming months we will make significant technology announcements from several of our subsidiaries. I look forward to being a part of the accelerated growth at Eagle Harbor Holdings."

Troy Niehaus, managing director of EHH's Elixsys subsidiary, stated: "David Marsing is a crucial addition to the Elixsys plant facilities design team. With David's help we're developing an aggressive timeline with a clear path to market for the Elixsys remediation byproducts. David's background and track record, combined with multiple patents pending on our processes, will ensure that Elixsys transitions smoothly to the marketplace and to revenue. I feel fortunate to have David Marsing on the team."

Eagle Harbor Holdings (EHH) has rapidly grown into a technology engineering leader developing an array of new technologies from their conceptualization to their commercialization. The Elixsys subsidiary focuses on industrial waste remediation and developing value-added products from various waste streams, such as converting coal fly ash to commercial products and commodities. EHH subsidiaries include MediusTech, Elixsys, Chameleon, AutoTalk, and SensorTech Systems.
