

Eagle Harbor Holdings Expands Senior Staff with Addition of Dr. F. Paul Carlson

Bainbridge Island, WA, --- February 25, 2011 --- With an eye towards continued growth in 2011, Eagle Harbor Holdings (EHH), LLC, a technology engineering developer and intellectual property licensor, announced today that corporate development veteran Dr. F. Paul Carlson has joined as advisor for corporate development and strategic planning for the formation of new subsidiaries. Initially Dr. Carlson will focus on corporate development for the Elixsys and Chameleon subsidiaries. He will assist managing director Joe Preston with Chameleon and managing director Troy Niehaus with Elixsys, LLC.

In addition to joining the EHH staff, Dr. Carlson is also President and CEO of the Carlson Group of Companies in Olympia, Washington and a co-founder of several other high-technology firms. Dr. Carlson most recently served as Chairman and CEO of Cascade Microtech, Inc. (CSCD) in a turn-around and restructuring initiative. Dr. Carlson was also a consultant to Lucent Technologies in New Jersey and Dallas, Cascade Microtech, in Portland, Oregon, and the Frank Russell Company in Tacoma. Other consulting activities have been in business reengineering and restructuring projects in Saudi Arabia, Bahrain, Jordan, Lucent Power Systems, AT&T Microelectronics, and Atcall, as well as development in other startup and early-stage companies. He has also been a part of joint venture initiatives for municipal telecommunication expansions, and community economic development projects, among others.

Joe Preston, managing director of EHH's Chameleon subsidiary, stated: "Paul brings to the table a

comprehensive track record in big-picture corporate development. I'm very familiar with that track record, having worked with him informally for over a decade. We welcome the opportunity to formalize the relationship. As we continue to grow rapidly, Paul's input and guidance will ensure that each phase of our growth is streamlined and maximized for bottom line revenue. I'm excited by this addition to our senior-level staff."

Dr. Carlson stated: "The EHH core properties are evolving into well received public products, and as a result we have set large but feasible revenue goals for the near future. The team here has put together an impressive road map for deliverables, and is right on track to achieve significant profits. I see many opportunities here and I'm honored and eager to help carve the path to success at Eagle Harbor Holdings."

With an ever-growing patent portfolio cultivated in-house, Eagle Harbor Holdings (EHH) has rapidly grown into a technology engineering leader developing an array of new technologies from their conceptualization to their commercialization. EHH focuses on the earliest stages of development, building from scratch and taking ideas through to "beta" test to prove commercial viability. EHH works in a variety of technology markets such as industrial metals recovery/recycling and vehicle telematics and infotainment, to name a few. EHH subsidiaries include MediusTech, Elixsys, Chameleon, VehicleTalk, and SensorTech Systems.
